Administration of Medicines Policy

Reviewed in May 2020 by staff members

Rationale:

The policy as outlined was put in place to:

- Clarify areas of responsibility
- To give clear guidance about situations where it is not appropriate to administer medicines
- To outline procedures to deal with a pupil with a nut allergy in our school
- To outline procedures to deal with pupils with epilepsy in our school
- Safeguard school staff that are willing to administer medication

Relationship to School Ethos:

The school promotes positive home-school contacts, not only in relation to the welfare of children, but in relation to all aspects of school life. This policy is in keeping with the school ethos through the provision of a safe, secure and caring school environment and the furthering of positive home-school links.

Aims of this Policy:

The aims and objectives of the policy can be summarised as follows;

- Minimise health risks to children and staff on the school premises
- Fulfil the duty of the BoM in relation to Health and Safety requirements
- Provide a framework within which medicines may be administered in cases of emergency or in instances where regularised administration has been agreed with parents/guardians

In -School Procedures:

Parents of children requiring prescribed medication complete a Health/Medication form when enrolling their child/ren in the school. No teacher is obliged to administer medicine or drugs to a pupil and any teacher willing to do so works under the controlled guidelines outlined below.

- Prescribed medicines will only be administered after parents of the pupil concerned have written to the BoM requesting the Board to authorise a member of the teaching staff to do so. Under no circumstance will non-prescribed medicines be either stored or administered in the school. The Board will seek indemnity from parents in respect of any liability arising from the administration of medicines.
- The school generally advocates the self-administration (e.g. inhalers) of medicine under the supervision of a responsible adult, exercising the standard of care of a prudent parent. A small quantity of prescription drugs will be stored in the school if a child requires such and parents have requested safe storage. Parents are responsible for the provision of medication and notification of change of dosage. All medicines need to be clearly labelled with names and dates.

- Teachers have a professional duty to safeguard the health and safety of pupils, both when they are authorised to be on the school premises and when they are engaged in authorised school activities elsewhere
- The Board of Management requests parents to ensure that teachers be made aware in writing of any medical condition suffered by any child in their class
- This does not imply a duty upon teachers personally to undertake the administration of medicines or drugs.

Long Term Health Problems

Where there are children with long-term health problems in school, proper and clearly understood arrangements for the administration of medicines must be made with the Board of Management. This is the responsibility of the parents/guardians. It would include measures such as self-administration, administration under parental supervision or administration by school staff.

Life Threatening Condition

Where children are suffering from life threatening conditions, parents/guardians must clearly outline, in writing, what should be done in a particular emergency situation, with particular reference to what may be a risk to the child (Appendix 3). If emergency medication is necessary, arrangements must be made with the Board of Management. A letter of indemnity must be signed by the parents in respect of any liability that may arise regarding the administration of medication.

Guidelines for the Administration of Medicines

1. The parents of the pupil with special medical needs must inform the Board of Management in writing of the condition, giving all the necessary details of the condition. The request must also contain written instruction of the procedure to be followed in administering the medication. (Appendix 1, 2 or 3)
2. Parents must write requesting the Board of Management to authorise the administration of the medication in school
3. Where specific authorisation has been given by the Board of Management for the administration of medicine, the medicines must be brought to school by the parent/guardian/designated adult
4. A written record of the date and time of administration must be kept by the person administering it (Appendix 4) This information needs to be added to the student file.
5. Parents/Guardians are responsible for ensuring that emergency medication is supplied to the school and replenished when necessary
6. Emergency medication must have exact details of how it is to be administered
7. The BoM must inform the school's insurers accordingly
8. Parents are further required to indemnify the Board of Management and members of the staff in respect of any liability that may arise regarding the administration of prescribed medicines in school
9. All correspondence related to the above are kept in the school.

Medicines

- Non-prescribed medicines will neither be stored nor administered to pupils in school
- Teachers/SNAs in the school will only administer prescribed medication when arrangements have been put in place as outlined above
- Arrangements for the storage of certain emergency medicines, which must be readily accessible at all times, must be made with the Principal
- A teacher/SNA must not administer any medication without the specific authorisation of the Board of Management
- The prescribed medicine must be self-administered if possible, under the supervision of an authorised Teacher/SNA if not the parent
- No teacher/SNA can be required to administer medicine or drugs to a pupil

- In an emergency situation, qualified medical assistance will be secured at the earliest opportunity and the parents contacted
- It is not recommended that children keep medication in bags, coats, etc.
- Where possible, the parents should arrange for the administration of prescribed medicines outside of school hours.

The following guidelines are in place with regard to pupils with a Nut Allergy

1. Castletownroche NS is a nut free school
2. Nobody eats nuts or any item with nut trace
3. Advise children not to offer or exchange foods, sweets, lunches etc.
4. If going off-site, medication must be carried.

In the event the pupil comes in contact with peanuts

1. Administer 5ml Zirtec/Sudafed or other antihistamine immediately. It is important that the pupil be kept calm to allow him/her to breathe calmly as he/she will experience discomfort and sensation of his/her throat swelling. If possible (s)he needs to drink as much water as possible. These steps should allow him/her to recover fully.
2. Only in the event of anaphylactic shock should the pen be administered. Pen is stored in a safe place in the classroom, accessible by the teacher. Before or immediately after Pen has been administered, an ambulance/parents must be called.

Indicators of shock include

Symptoms of shock can include, wheezing, severe difficulty breathing and gastrointestinal symptoms such as abdominal pain, cramps, vomiting and diarrhoea.

Coeliac disease

In the case of students with Coeliac disease, all tables must be wiped down fully after eating times. Parents will provide appropriate treats when necessary. All staff are aware of the student/s in question.

School Doctor's contact number by each phone in school.

Emergencies:

In the event of an emergency, teachers should do no more than is necessary and appropriate to relieve extreme distress or prevent further and otherwise irreparable harm. Qualified medical treatment should be secured in emergencies at the earliest opportunity.

Where no qualified medical treatment is available, and circumstances warrant immediate medical attention, two members of staff may take a child into Accident and Emergency without delay. Parents will be contacted simultaneously.

In addition, parents must ensure that teachers are made aware in writing of any medical condition which their child is suffering from. For example children who have epilepsy, diabetes etc. may have a seizure at any time and teachers must be made aware of symptoms in order to ensure that treatment may be given by appropriate persons.

Written details are required from the parents/guardians outlining the child's personal details, name of medication, prescribed dosage, whether the child is capable of self-administration and the circumstances under which the medication is to be given. Parents should also clearly outline correct procedures for children who require medication for life threatening conditions.

The school maintains an up to date register of contact details of all parents/guardians including emergency numbers. This is updated in September of each new school year.

Emergency Procedures

In the event of any child displaying any symptoms of medical difficulty or severe injury, the following procedures should be followed.

Call doctor

Dial 999 and call emergency services.

Contact Parents

General Recommendations:

We recommend that any child who shows signs of illness should be kept at home; requests from parents to keep their children in at lunch break are not encouraged. A child too sick to play with peers should not be in school.

Roles and Responsibilities:

The BoM has overall responsibility for the implementation and monitoring of the school policy on Administration of Medication. The Principal is the day to day manager of routines contained in the policy with the assistance of all staff members.

Success Criteria:

The effectiveness of the school policy in its present form is measured by the following criteria;

- Compliance with Health and Safety legislation
- Maintaining a safe and caring environment for children
- Positive feedback from parents/teachers
- Ensuring the primary responsibility for administering remains with parents/guardians

Ratification of Policy:

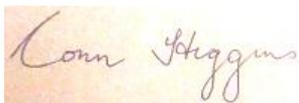

This policy was adopted by the Board of Management on 15/12/'21

Policy review:

In accordance with the systematic review of policies in Castletownroche N.S., this policy will be reviewed every 3 years or immediately following any serious incidences or if a need arises.

Staff will be informed that the review has been completed. The updated policy will be readily accessible to all members of the school community; a policy folder will be available in all classrooms, it will be published on the school website & will also be provided to the Parent's Association. A record of the review and its outcome will be made available, if requested, to the patron and the Department.

Is the child to be responsible for taking the prescription
him/herself? _____

What action is required?

Administration Procedure (When, Why, How)

I/We request that the Board of Management authorise the taking of Prescription Medicine during the school day as it is absolutely necessary for the continued well-being of my/our child. I/We understand that we must inform the school/Teacher of any changes of medicine/dose in writing and that we must inform the teacher each year of the prescription/medical condition. I/We understand that no school personnel have any medical training and we indemnify the Board from any liability that may arise from the administration of the medication.
